The State of Wisconsin

CONSERVATION DEPARTMENT

Madison 2, Wisconsin
November 30, 1950

Mr. Raymond Kronforst
Mishicot
Wisconsin

Dear Mr. Kronforst:

We have just received Mr. Matt Patterson's report on the lamprey control activities in the East Twin River for 1950.

He states that you were very helpful in installing the trap, keeping the screens and trap free from debris, taking out the lamprey, and keeping records for the Mishicot trap.

I wish to extend to you the appreciation of the Conservation Department for your cooperation and help in making it possible to operate the trap across the East Twin River near Mishicot, Wisconsin.

Mr. Patterson reports that there were 7,712 lamprey taken from the East Twin River during the operations.

In addition to Mr. Stanley Stelzer and Mr. Harvey Devorak, who we have written personally, other members of the Rod and Gun Club and other interested persons helped with the installation of the trap and keeping it in operation. We have not written to them direct, but wish you would extend to them our appreciation of their services.

Very truly yours,
FISH MANAGEMENT DIVISION

Edw Schneberger
